

We have XM Radio in two of our vehicles, and thoroughly enjoy it. I travel a lot, and having localized weather and traffic reports are very important to me.

Please reject NAB's Petition 04-160.

XM Radio has made travel so much more enjoyable to myself and our whole family.

It sounds to us like NAB represents a bunch of sore losers. If they could provide the content and nationwide service that XM does, this wouldn't even be an issue.

XM should, at minimum, have the same privileges and rights as any other broadcaster.

Thanks.
